# Middle-Market Lending Key Takeaways

## Takeaways

- Reference rates for loans issued by credit-estimated companies have jumped by roughly 500 basis points (bps), and issuers are now facing sharply increased debt servicing costs. Many of these companies set up more ambitious capital structures in a different rate regime that may prove unsustainable and push them to a 'ccc' credit estimate score.
- For third-quarter 2023, U.S. credit estimates saw the highest number of downgrades since the pandemic: an aggregate of 91 entities saw credit estimates lowered, with over 75% of these going into the 'ccc' category. Year to date, there have been a total of 61 upgrades and 175 downgrades, bringing the aggregate credit estimate upgrade-to-downgrade ratio to 0.35.
- We've noticed a pickup in credit events ("specified amendments") for credit-estimated companies. Most of the amendments are looking to push back upcoming maturities as sponsor ability to exit remains challenging given market volatility and diverse views on valuation. Another theme for amendments is issuers requesting a deferral of interest or the ability to pay-in-kind (PIK) upcoming interest payments. We have also received notifications to reschedule principal payments. Year to date, we have seen three instances where lenders took ownership/majority stake in the companies.
- Defaults have slowed down in the syndicated loan market, with the trailing 12-month Morningstar LSTA US Leveraged Loan Index default rate dropping to 1.67% in September from 1.86% back in August. Among rated loan issuers, we expect the trailing-12-month Morningstar LSTA US Leveraged Loan Index default rate to increase to 2.75% by June 2024 under our base case, a bit higher than the historical average rate of 2.50%. Under our pessimistic case, we think defaults could increase to 4.75% over the same period.
- We expect downgrades to dominate upgrades for the rest of the year and early next year. We also expect selective defaults to rise as more companies will look to seek amendments around maturity and liquidity.
- Recurring revenue loans represent a small proportion of our outstanding credit estimates (currently about 100 companies). The median EBITDA for these companies is about \$4 million, and 70% have a credit estimate score in the 'ccc' range. The remaining are 'b-'. See slide 13 for more information.

## Key risks

- The higher-for-longer rate environment will be a drain on the funds from operations (FFO) for small growth companies that have high debt levels to begin with.
- Upcoming maturities will be a challenge as private equity exit timelines are pushed back given market volatility.

# Middle-Market CLO Key Takeaways

## Takeaways

- Middle-market collateralized loan obligations (CLOs) have seen strong new issuance this year, with year-to-date volume surpassing 2022 total issuance by end of July 2023. Through September, \$18.38 billion of middle-market CLOs have been issued, versus \$9.38 billion over the same period last year, an increase of 95%. Broadly-Syndicated Loan (BSL) CLO issuance over the same period is down 32.5% this year.
- There were 91 credit estimate downgrades in Q3 2023, a sharp increase from prior quarters (see slide 10). This is a relatively small proportion of our 2,500 outstanding credit estimates but did result in higher 'ccc' baskets and exposure to defaulted assets. Other metrics have mostly held steady so far (slide 17):
  - The average 'CCC' basket has crept up to 12.32% of total assets, up from 9.58% a year ago.
  - Defaulted assets in middle-market CLOs ticked up slightly but remain low at 0.47%, up from 0.15% a year ago.
  - The average S&P Global Rating's weighted average rating factor (SPWARF) was mostly unchanged at 3855, versus 3800 a year ago.
- Middle-market CLO junior overcollateralization (O/C) ratios have an average cushion of 6.9%, which has modestly declined over the past year but remains at a high level. The O/C test haircuts that are happening are mostly due to defaulted assets held (see slide 20). While middle-market CLO 'CCC' buckets have increased, most are still well below the typical 17.5% threshold, meaning the Q3 2023 spike in credit estimate downgrades will have little impact.
- Software and healthcare providers and services are the two largest sectors within both middle-market and BSL CLOs. The average middle-market CLO has 15.87% of its assets in software companies versus 11.58% for the average BSL CLO, and 9.38% of its assets in healthcare providers and services versus 6.63% for the average BSL CLO (see slide 19).
- The median EBITDA for credit-estimated companies varies significantly across middle-market CLO managers. We provide median EBITDA and other metrics at the CLO manager level on slide 22.
- On October 16<sup>th</sup>, we published our 2023 middle-market CLO rating scenario analysis (see slides 26 and 27). The results show that middle-market CLOs can withstand comparable defaults with less rating impact than BSL CLOs. The study also notes that middle-market CLOs have performed better than BSL CLOs during the amortization phase, with less deterioration in credit metrics.
- Despite the increase in credit estimate downgrades, our outlook for middle-market CLO ratings remains stable. While there could be scattered downgrades among lower rated middle-market CLO tranches, in our view most of these transactions have a large capacity (and rating cushions) to absorb credit deterioration among the underlying collateral.

# Credit Estimates | Median Leverage And Interest Coverage By Sector

Household products has displaced software as the highest leverage sector

Metrics for companies with credit estimates updated through Q3 2023

**Top 10 industries with the highest S&P Global Ratings-calculated leverage ratios after factoring in the higher benchmark rate**

| Industry                            | Median of debt/EBITDA (x) | Number of obligors |
|-------------------------------------|---------------------------|--------------------|
| Household products                  | 9.32                      | 5                  |
| Software                            | 8.04                      | 171                |
| Capital markets                     | 7.94                      | 7                  |
| Diversified consumer services       | 7.84                      | 61                 |
| Personal products                   | 7.73                      | 15                 |
| Insurance                           | 7.69                      | 39                 |
| Construction materials              | 7.38                      | 4                  |
| IT services                         | 7.13                      | 61                 |
| Healthcare providers and services   | 6.98                      | 174                |
| Wireless telecommunication services | 6.97                      | 9                  |

Excludes sectors with fewer than four credit estimates outstanding. Source: S&P Global Ratings.

**Top 10 industries with the lowest S&P Global Ratings-calculated interest coverage ratios after factoring in the higher benchmark rate**

| Industry                            | Median interest coverage (x) | Number of obligors |
|-------------------------------------|------------------------------|--------------------|
| Household products                  | 1.02                         | 5                  |
| Software                            | 1.04                         | 171                |
| Personal products                   | 1.21                         | 15                 |
| Diversified consumer services       | 1.27                         | 61                 |
| Insurance                           | 1.32                         | 39                 |
| Textiles, apparel, and luxury goods | 1.36                         | 10                 |
| Health care technology              | 1.37                         | 48                 |
| Healthcare providers and services   | 1.42                         | 174                |
| IT services                         | 1.42                         | 61                 |
| Aerospace and defense               | 1.43                         | 24                 |

Excludes sectors with fewer than four credit estimates outstanding. Source: S&P Global Ratings.

# Credit Estimates | Top 10 Sectors By % Of Companies With <1.0x Interest Coverage (I/C) Ratios

Top 10 sectors by % of companies with I/C ratios less than 1.0x

| Industry                               | % of companies with less than 1.0x | Median I/C ratio for whole sector |
|--|------------------------------------|-----------------------------------|
| Software                               | 47                                 | 1.04                              |
| Household durables                     | 33                                 | 1.48                              |
| Personal products                      | 33                                 | 1.21                              |
| Wireless telecommunication services    | 33                                 | 1.44                              |
| Building products                      | 31                                 | 1.60                              |
| Beverages                              | 29                                 | 2.94                              |
| Construction materials                 | 25                                 | 1.94                              |
| Health care technology                 | 25                                 | 1.37                              |
| Real estate management and development | 25                                 | 1.97                              |
| Diversified consumer services          | 25                                 | 1.27                              |

I/C--Interest coverage. Excludes sectors with fewer than four credit estimates outstanding. Source: S&P Global Ratings.

- Almost half of the companies in the software sector have an interest coverage ratio of less than 1.0x, given their highly leveraged capital structures.
- However, liquidity for software is a relatively healthy 2.85 times, which is close to the median liquidity of 2.94 for the entire universe of companies reviewed this year.
- Healthcare providers, the most represented sector in credit estimates, has approximately 20% of companies with an interest coverage ratio less than 1.0x.

# Credit Estimates | Revenue And Leverage Trends

Change in metrics for credit-estimated obligors (2022 reviews vs. 2023 reviews)

### Revenue: 2022 vs. 2023

Source: S&P Global Ratings.

### Leverage: 2022 vs. 2023

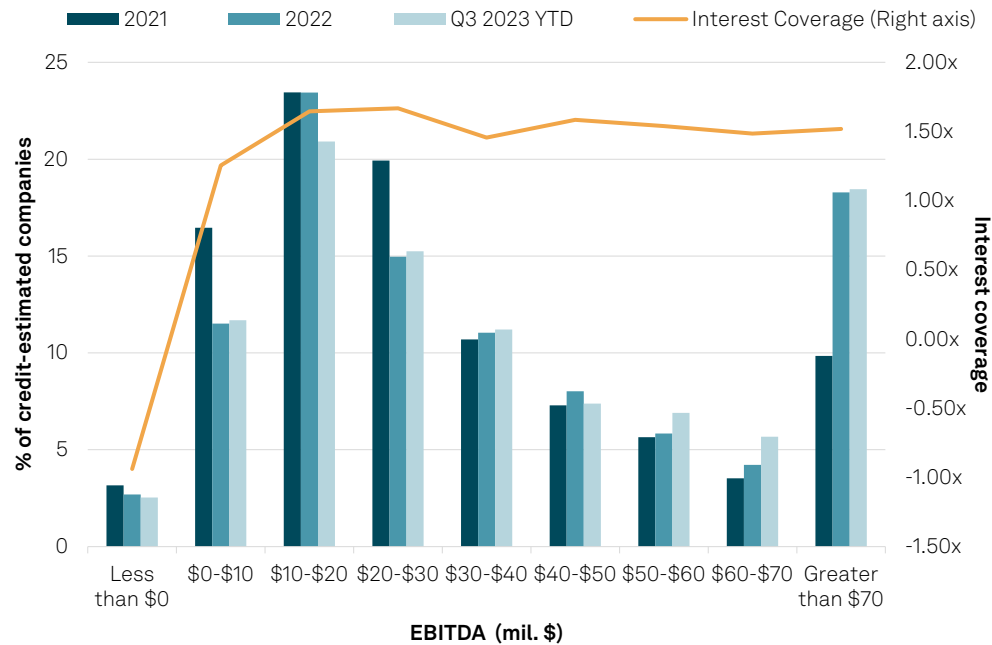

Source: S&P Global Ratings.

- Each point in the scattergrams represent a single credit-estimated company reviewed in 2022 and 2023.
- Points above the trendline indicate growth in revenue and leverage.
- For reviews done in 2023, revenue has continued to grow due in part to acquisitions.
- Revenue and EBITDA increased year over year in 80% and 61% of cases, respectively. Still, leverage increased in 53% of cases.
- For reviews done, median revenue and EBITDA increased by 21% and 30%, respectively, while leverage went up by 28%.

# Credit Estimates | EBITDA And Free Operating Cash Flow Distribution

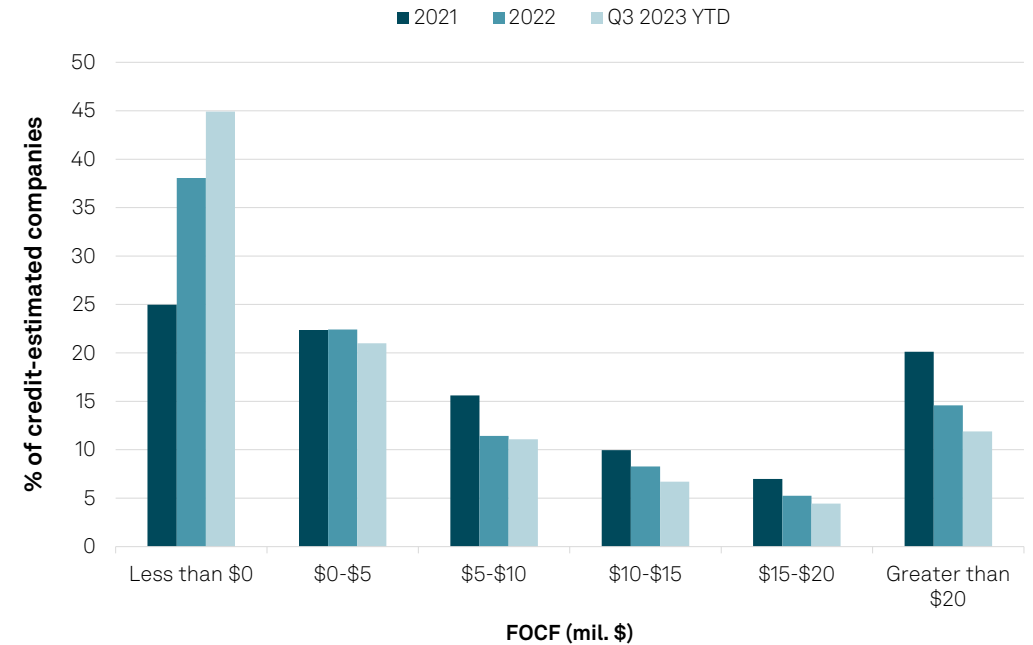

- Roughly 3% of companies reviewed in the first three quarters of 2023 generated negative EBITDA.
- About 45% of companies reviewed during the same period generated negative free operating cash flow (FOCF) (post-application of higher benchmark rates).
- The negative FOCF, in part, also reflects companies willing to invest in capital expenditure.
- Coverage ratio appears to be agnostic to the size of the company (using EBITDA as a proxy).

## EBITDA

YTD--Year to date. Source: S&P Global Ratings.

## Free operating cash flow

All outstanding S&P Global Ratings credit estimates (2012–Q3 2023)\*

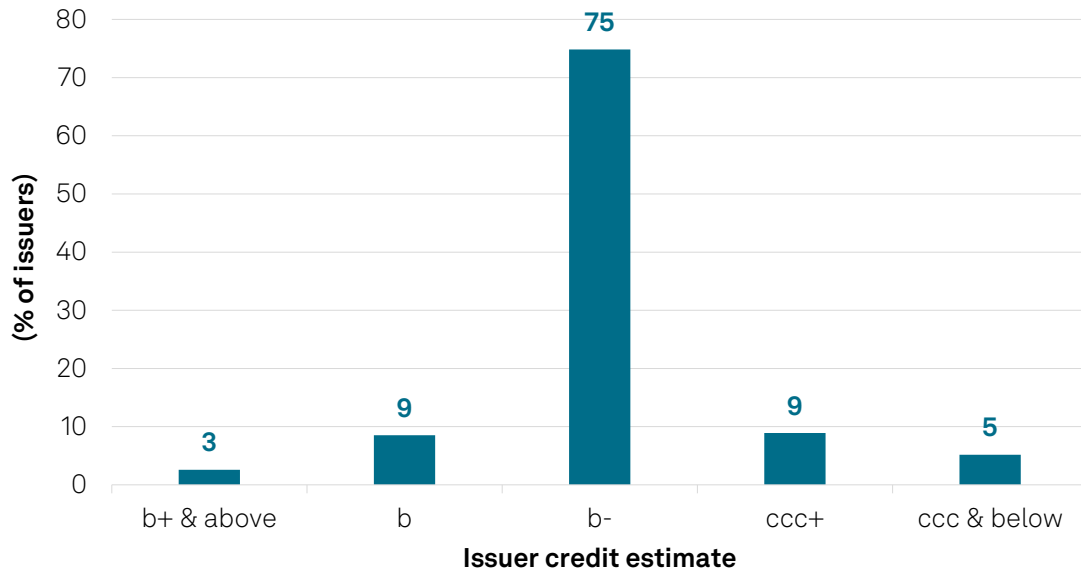

\*Covers all outstanding S&P Global Ratings U.S. credit estimates, including a small number of estimates for obligors not currently held within a CLO transaction. CLO--Collateralized loan obligation. Source: S&P Global Ratings.

# Credit Estimates | Credit Estimate Scores As Of Third-Quarter 2023

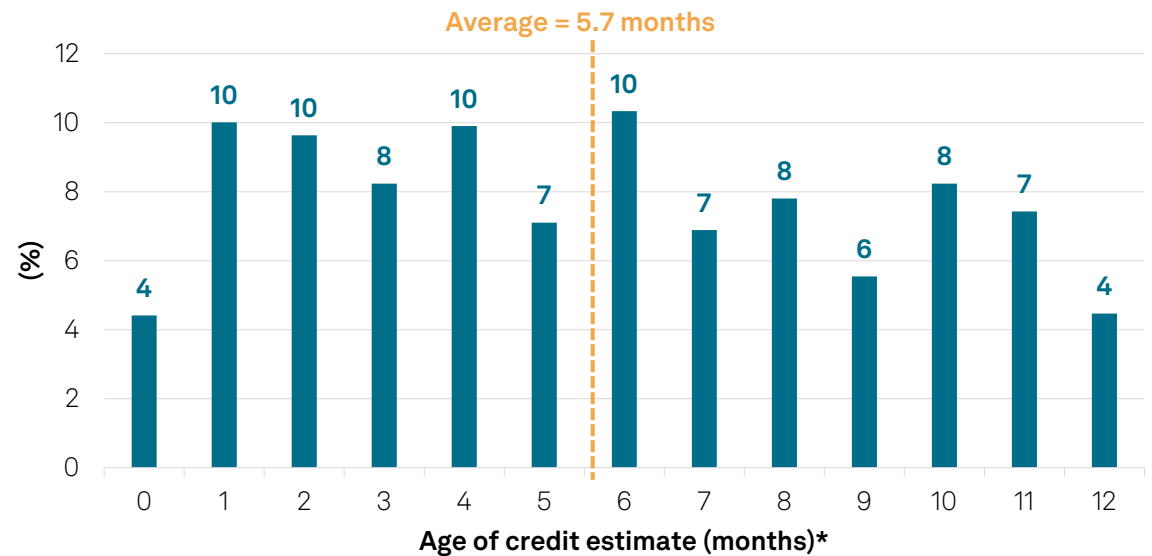

- Many of the companies we assign credit estimates to are financial sponsor-owned and generally highly levered.
- For credit-estimated companies reviewed in 2023, the median EBITDA was \$30 million, and the median adjusted debt was about \$195 million.
- Due to their weaker business and financial risk profiles, a large majority of these companies tend to have credit estimate scores at the lower end of the credit spectrum, especially 'b-'.
- Credit estimates are updated at least every 12 months, but, in practice, the average time since last review of outstanding estimates is shorter, at just over five months.

Credit estimates outstanding as of third-quarter 2023\*

# Credit Estimates | Credit Estimates Changes Vs. Rating Changes

- Downgrades peaked in the second quarter of 2020 due to the pandemic, as we lowered credit estimate scores to 'ccc'/'sd'/'d' on over 85 entities.
- From the second-quarter of 2021 through the third-quarter of 2022, upgrades outpaced downgrades. However, that trend changed in the third quarter of 2022.
- In third-quarter 2023, we saw the highest number of downgrades since second-quarter 2020. So far in 2023, downgrades have surpassed upgrades almost 3:1.

Credit estimates raised and lowered (Q1 2020-Q3 2023)

BSL Ratings raised and lowered (Q1 2020-Q3 2023)

Beginning in second-quarter 2023, we have excluded upgrades/downgrades outside the construct of a CLO. CLO--Collateralized loan obligation.

# Credit Estimates | Raised And Lowered By Sector

## 61 upgrades through Q3 YTD 2023(i)

| Top five sectors upgraded           | Overall percentage of upgrades (%) | Sector exposure of total credit estimates (%) | Count of obligor (no.) |
|-------------------------------------|------------------------------------|---|------------------------|
| 1 Commercial services and supplies  | 14.8                               | 7.5   | 9                      |
| 2 Hotels, restaurants, and leisure  | 8.2                                | 2.8   | 5                      |
| 3 Software                          | 8.2                                | 11.7  | 5                      |
| 4 Media                             | 4.9                                | 3.4   | 3                      |
| 5 Healthcare providers and services | 4.9                                | 11.9  | 3                      |

## 175 downgrades through Q3 YTD 2023

| Top five sectors downgraded         | Overall percentage of downgrades (%) | Sector exposure of total credit estimates (%) | Count of obligor (no.) |
|-------------------------------------|--------------------------------------|---|------------------------|
| 1 Healthcare providers and services | 18.9                                 | 11.9  | 33                     |
| 2 Software                          | 12.6                                 | 11.7  | 22                     |
| 3 Commercial services and supplies  | 7.4                                  | 7.5   | 13                     |
| 4 Healthcare equipment and supplies | 5.7                                  | 3.3   | 10                     |
| 5 Professional services             | 4.6                                  | 6.1   | 8                      |

Credit-estimate downgrades increased substantially in third-quarter 2023, due to:

- Upcoming maturities with no refinancing plans in place.
- Negative FFO because of higher interest rates.
- Unsustainable capital structures with high leverage.
- Covenant breaches where lenders issued “reservation of rights” letters.
- Inflation, resulting in increased wages and material costs.

(i) Beginning in second-quarter 2023, we have excluded upgrades/downgrades outside the construct of a CLO. CLO--Collateralized loan obligation. YTD--Year to date. Source: S&P Global Ratings.

# Credit Estimates | Credit Quality Over The Years

Outstanding credit estimate distribution by issuer count (2007–Q3 2023)\*

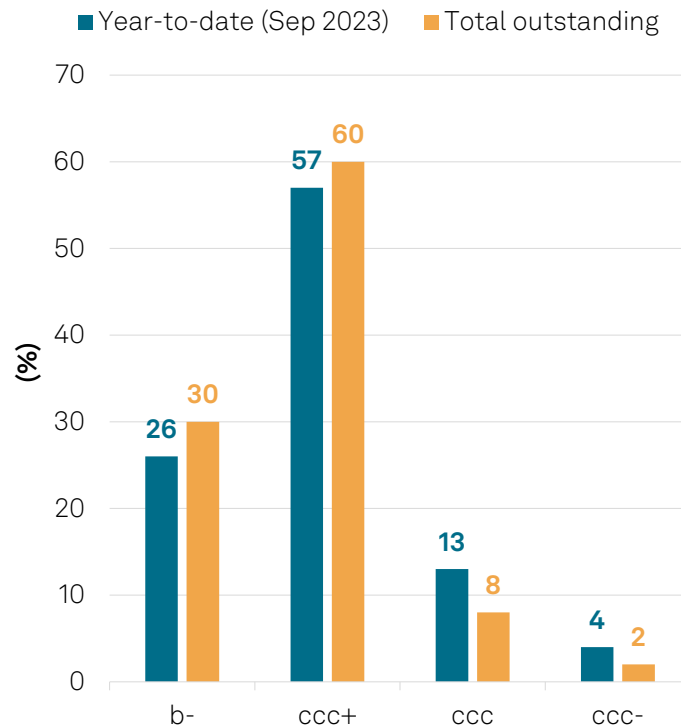

- Before the pandemic, about 75% of our outstanding credit estimates were ‘b-’.
- This dropped to about 71% after the pandemic induced downgrades of ‘b-’ credit estimates into the ‘ccc’ category.
- By 2023, over 75% of outstanding credit estimates were back at ‘b-’ as performance of companies rebounded, and many obligors saw their credit estimates raised back to ‘b-’ from the ‘ccc’ range.

\*Covers all outstanding S&P Global Ratings U.S. credit estimates, including estimates for obligors not currently held within a CLO transaction. CLO--Collateralized loan obligation. Source: S&P Global Ratings.

# Credit Estimates | Recurring Revenue

Recurring revenue companies represent a small proportion (<4%) of our outstanding credit estimates, typically for software companies. These companies use revenue-based leverage rather than EBITDA for covenant compliance.

## Recurring revenue score distribution

## Credit metrics: Recurring revenue deals

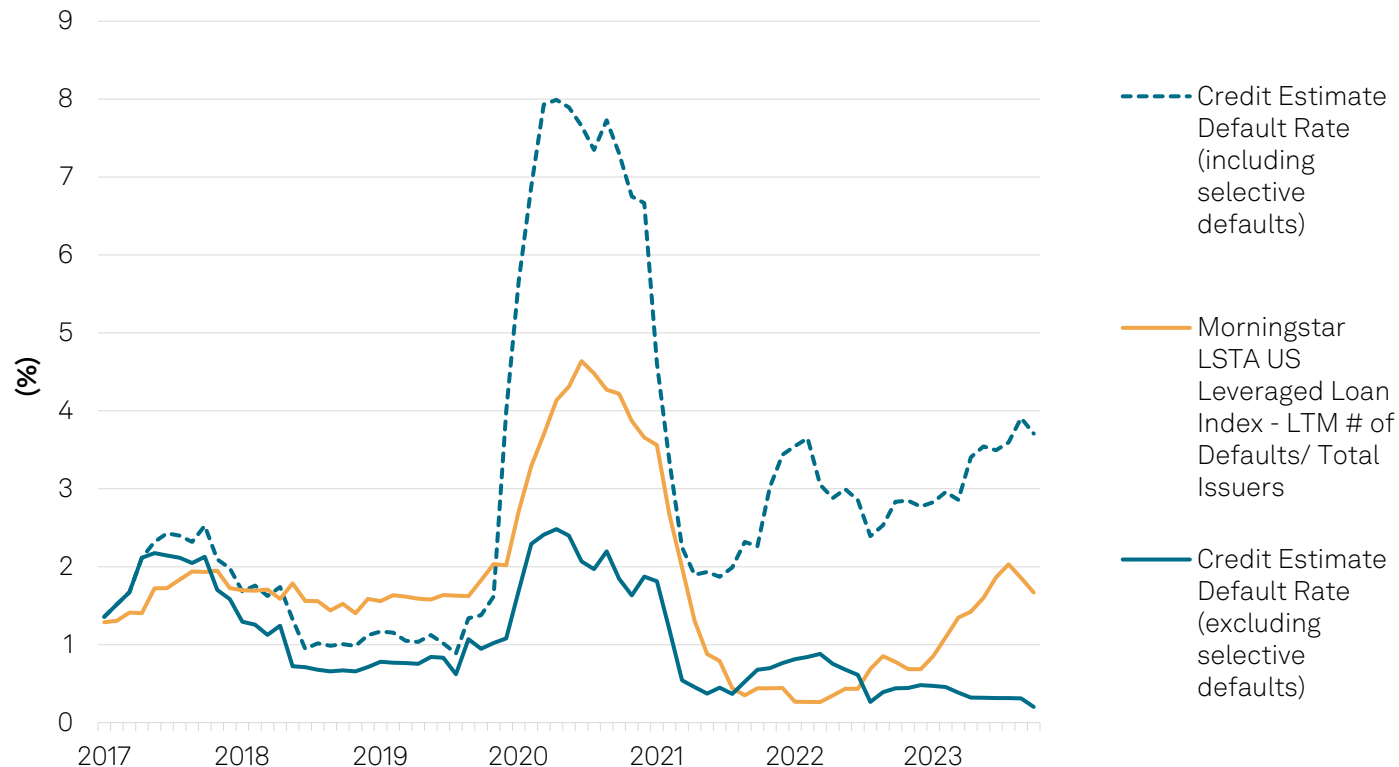

| Metrics (median)       | Year-to-date (Sept. 2023) | Total outstanding |
|------------------------|---------------------------|-------------------|
| No. of deals           | 54                        | 99                |
| EBITDA (mil. \$)       | 5.85                      | 4.12              |
| Leverage               | 25.86                     | 40.16             |
| Cash interest coverage | 0.29x                     | 0.23x             |
| Interest coverage      | 0.24x                     | 0.19x             |
| Capex (mil. \$)        | 1.57                      | 1.13              |
| FOCF to debt (%)       | -8.42                     | -6.06             |
| Liquidity ratio        | 1.83                      | 2.04              |

- In a higher-for-longer rate environment, increased debt servicing charges will exert pressure on recurring-revenue companies to prioritize liquidity. This may be at the expense of upfront investments and could affect their long-term trajectory and growth.
- Recurring revenue deals compare unfavorably on metrics such as EBITDA and FOCF compared to other middle-market deals.
- They tend to have higher LTVs and a higher sponsor equity contribution.

Capex—Capital expenditure. FOCF—Free operating cash flow. YTD--Year to date. Source: S&P Global Ratings.

# Credit Estimates | Default Rate Comparison

One-year lagging default rate: credit estimates vs. Morningstar  
LSTA U.S. Leveraged Loan index

Source: S&P Global Ratings and Pitchbook/LCD.

- The dashed blue line in the chart, which includes both selective and conventional defaults among credit-estimated issuers, has trended up towards 4%, as selective defaults picked up during the third quarter when distressed companies addressed liquidity concerns with A-to-E or interest deferral. The defaults during the pandemic were double the current defaults but came down since and have been hovering between 2% and 4% since.
- Defaults slowed down in the syndicated loan market, though. The trailing 12-month Morningstar LSTA US Leveraged Loan Index default rate dropped to 1.67% in September from 1.86% in August.
- If we exclude selective defaults and focus only on conventional defaults among credit estimated issuers (solid blue line), the default rate continues to trend down, reinforcing the view that there is very little by way of traditional defaults (chapter 11, general payment default, etc.).

# Credit Estimates | Selective Defaults

Transition table for credit estimate selective defaults that occurred in 2023

Credit estimate score post-selective default (%)

| Credit estimate score pre-SD | b   | b- | ccc+ | ccc | ccc- | cc | Proportion higher post-SD | Proportion same post-SD | Proportion lower post-SD |
|------------------------------|-----|----|------|-----|------|----|---------------------------|-------------------------|--------------------------|
| b                            | 100 |    |      |     |      |    | 0                         | 0                       | 100                      |
| b-                           |     | 21 | 29   | 18  | 32   |    | 0                         | 21                      | 79                       |
| ccc+                         |     | 17 | 33   | 42  | 8    |    | 17                        | 33                      | 50                       |

SD--Selective default. Source: S&P Global Ratings.

- The biggest reasons for selective defaults were A-to-E transactions followed by interest deferrals.
- Close to 80% of selective defaults that occurred in the ‘b-’ category were reassessed at the ‘ccc’ category post-selective default.
- Selective defaults is most prevalent amongst the healthcare providers and software sectors.

# Middle-Market CLOs | 'CCC' Buckets Increase, Other Metrics Stable

- The increased count of lowered credit estimates in Q3 (slide 10) have resulted in a notable increase in 'CCC' buckets as well as default buckets across MM CLO portfolios.
- Haircuts from defaults and in a small handful of instances, excess 'CCC' exposures have resulted in O/C numerator haircuts, leading to a slight decline in junior O/C test cushions.
- However, at 6.9% the average middle-market CLO junior O/C test cushion remains large.

Credit metrics averaged across 65 reinvesting S&P Global Ratings-rated middle-market CLOs

# Middle-Market CLOs | O/C Test Cushions And Haircuts

## Average O/C metrics for reinvesting U.S. MM CLOs

## Average O/C metrics for amortizing U.S. MM CLOs

O/C—Overcollateralization. MM--Middle market. Source: S&P Global Ratings.

- Overcollateralization (O/C) cushions across reinvesting U.S. middle-market (MM) CLOs have declined slightly since the start of the year; though on average, they still remain positive at just under 7% as of the end of third quarter 2023.
- The O/C haircuts for the reinvesting U.S. MM CLOs mostly come from default exposures; most reinvesting deals are not close to breaching their 'CCC' thresholds, though a few transactions exceeded their 'CCC' thresholds (most deals have a 17.5% 'CCC' threshold).
- O/C haircuts across amortizing U.S. MM CLOs are larger relative to the reinvesting transactions; both default exposures and excess 'CCC' exposures contribute a large majority of the haircuts.
- Despite the higher average haircuts, the junior O/C cushions for amortizing transactions is higher than reinvesting transactions due to the senior note paydowns.

# Middle-Market CLOs | Few Downgrades In 2020 (And None Since)

BSL--Broadly syndicated loan. CLO--Collateralized loan obligation. Source: S&P Global Ratings.

Middle-market CLO transactions performed well during the pandemic, with only seven ratings lowered during 2020--about 1.3% of the outstanding ratings at the time, versus 13.0% of BSL CLO ratings lowered during the year. Why?

- CLO structural reasons:** Middle-market CLOs tend to have more par subordination and rating cushion at a given tranche level than a typical BSL CLO, with this being positively correlated with the proportion of credit estimates in a CLO collateral pool. Middle-market CLOs also sometimes don't issue lower-rated ('BBB' and 'BB') tranches, which would be more likely to see downgrades than more senior tranches.
- Fewer loan payment defaults:** In 2020, parties to middle-market loan agreements were able to amend loan terms in ways that avoided payment defaults and bankruptcy. This took different forms: rolling scheduled amortization into the final bullet, allowing a company to PIK upcoming interest payments, pushing out loan maturities, etc. S&P Global Ratings treated some of these as selective defaults, but they reduced the level of conventional (payment) defaults (see slide 13).
- Some sponsors injected cash into their companies:** This was done because, in some cases, sponsors saw value in infusing equity rather than losing control of the company in a payment default/bankruptcy scenario. In a more protracted downturn, however, the economic incentives to do this might be less appealing.
- CLO manager asset swaps:** Under their CLO indenture provisions, middle-market CLO managers can swap out distressed assets from the portfolio and replace them with loans from better-performing companies. Because middle-market CLO managers often (although not always) hold the CLO equity in their transactions, and because they often manage assets across different types of accounts, in some cases they may be incentivized to move distressed assets outside of their CLO(s) and replace them. It's also often easier for a manager to work out a distressed loan outside the CLO.
- Par build from new loans:** New issue loans are typically placed into middle-market CLOs at a small discount – for example, 97.5% or 98% of par. Since these loans are carried at par, they increase the overall par value of the collateral pool and benefit the CLO. During periods of stress, collateral turnover will likely slow and the effect will be muted. During periods of higher collateral turnover, such as in 2021, the effect can be more pronounced.

# Middle-Market CLOs | Company Size Varies By Middle-Market CLO Manager

EBITDA of credit-estimated issuers held by MM CLO managers

- There are about 1,700 issuers with loans held across the MM CLOs we rate, almost as many as the loans held in the BSL CLOs we rate.
- Since 2017, several managers have issued their inaugural MM CLO, adding to the number of unique credit estimated issuers.
- MM CLO managers may have a specialty across certain industries as well as certain sized companies.
  - Lower middle market: < \$20 million
  - Core middle market: \$20 million to \$50 million
  - Upper middle market: \$50 million to \$100 million
- Median EBITDA of loans held by MM CLO managers can vary widely.

(i)Based on Q1 2023 exposure to companies with ratings/credit estimates raised and lowered in Q2 2023. Includes both rated obligors and credit estimated obligors. (ii)Assets without credit estimate (or other derived S&P Global Ratings' credit rating) treated as 'ccc-' for purposes of SPWARF calculation. Includes both rated and credit estimated obligors. MM--Middle-market. CLO--Collateralized loan obligation. DG--Downgrade. UG--Upgrade. SPWARF--S&P Global Ratings weighted average rating factor. WAS--Weighted average spread. WAM--Weighted average maturity. CE--Credit estimate. Source: S&P Global Ratings.

# Middle-Market CLOs | Third-Quarter 2023 Middle-Market Manager Metrics Continued...

| Manager              | Largest GICS Industry (%) | Largest GICS industry             | No. of GICS industries | Largest issuer exposure (%) | No. of issuers | DG:UG ratio in Q3 2023(i) | Credit estimated issuers (%) | Proportion credit estimated in Q3 2023 (%) | Median EBITDA of CE issuers | Average EBITDA of CE issuers | SPWARF (ii) | WAS (%) | WAM  | % of MM CLO assets unique to manager | Manager with largest overlap | Proportion overlap (%) |

(i)Based on Q1 2023 exposure to companies with ratings/credit estimates raised and lowered in Q2 2023. Includes both rated obligors and credit estimated obligors. (ii)Assets without credit estimate (or other derived S&P Global Ratings' credit rating) treated as 'ccc-' for purposes of SPWARF calculation. Includes both rated and credit estimated obligors. MM--Middle-market. CLO--Collateralized loan obligation. DG--Downgrade. UG--Upgrade. SPWARF--S&P Global Ratings weighted average rating factor. WAS--Weighted average spread. WAM--Weighted average maturity. CE--Credit estimate. Source: S&P Global Ratings.

# Rating Stress Scenarios | How Resilient Are Middle-Market CLO Ratings?

MM--Middle market. WA--Weighted average. Source: S&P Global Ratings.

- We applied a series of hypothetical stress scenarios to our rated middle-market CLO transactions, generating quantitative analysis for each one using our CLO rating models (CDO Evaluator and S&P Cash Flow Evaluator) (see [“Scenario Analysis: How Resilient Are Middle-Market CLO Ratings \(2023 Update\)?”](#) published Oct. 16, 2023.)
- The scenarios feature increasing levels of collateral default stress.
- The stress scenarios show the fundamentals of the CLO structure protecting the noteholders, especially for the senior CLO tranches, and that middle-market CLOs can withstand comparable asset defaults with less rating impact than BSL CLOs.

# Rating Stress Scenarios | How Resilient Are Middle-Market CLO Ratings?

## Hypothetical stress scenario results

### Scenario One: 10% default / 5% par loss

| Current tranche rating | CLO tranche rating movement under scenario (%) |      |      |    |      |      |    |      | Avg. notches | Spec.-grade | 'CCC' category | Below 'CCC-' |

### Scenario Two: 15% default / 7.5% par loss

| Current tranche rating | CLO tranche rating movement under scenario (%) |       |      |      |    |      |      |      | Avg. notches | Spec.-grade | 'CCC' category | Below 'CCC-' |
|------------------------|--|-------|------|------|----|------|------|------|--------------|-------------|----------------|--------------|
|                        | 0  | -1    | -2   | -3   | -4 | -5   | -6   | -7+  |              |             |                |              |
| 'AAA'                  | 98.17  | 1.83  |      |      |    |      |      |      | -0.02        |             |                |              |
| 'AA'                   | 98.83  |       | 1.17 |      |    |      |      |      | -0.02        |             |                |              |
| 'A'                    | 94.16  | 3.65  | 1.46 | 0.73 |    |      |      |      | -0.09        |             |                |              |
| 'BBB'                  | 90.60  | 6.84  | 2.56 |      |    |      |      |      | -0.12        | 5.13        |                |              |
| 'BB'                   | 65.67  | 20.90 | 4.48 | 1.49 |    | 1.49 | 1.49 | 4.48 | -0.82        | 100.00      | 2.99           | 4.48         |

### Scenario Three: 20% default / 10% par loss

| Current tranche rating | CLO tranche rating movement under scenario (%) |       |       |       |      |      |      |       | Avg. notches | Spec.-grade | 'CCC' category | Below 'CCC-' |
|------------------------|--|-------|-------|-------|------|------|------|-------|--------------|-------------|----------------|--------------|
|                        | 0  | -1    | -2    | -3    | -4   | -5   | -6   | -7+   |              |             |                |              |
| 'AAA'                  | 93.04  | 6.96  |       |       |      |      |      |       | -0.07        |             |                |              |
| 'AA'                   | 95.91  | 2.92  | 1.17  |       |      |      |      |       | -0.05        |             |                |              |
| 'A'                    | 63.50  | 23.36 | 11.68 | 0.73  | 0.73 |      |      |       | -0.52        | 0.73        |                |              |
| 'BBB'                  | 48.72  | 41.03 | 5.98  | 2.56  | 1.71 |      |      |       | -0.68        | 48.72       |                |              |
| 'BB'                   | 25.37  | 28.36 | 8.96  | 11.94 | 2.99 | 7.46 | 4.48 | 10.45 | -2.33        | 100.00      | 14.93          | 10.45        |

### Scenario Four: 30% default / 15% par loss

| Current tranche rating | CLO tranche rating movement under scenario (%) |       |       |       |       |      |      |       | Avg. notches | Spec.-grade | 'CCC' category | Below 'CCC-' |
|------------------------|--|-------|-------|-------|-------|------|------|-------|--------------|-------------|----------------|--------------|
|                        | 0  | -1    | -2    | -3    | -4    | -5   | -6   | -7+   |              |             |                |              |
| 'AAA'                  | 53.11  | 45.79 |       | 1.10  |       |      |      |       | -0.49        |             |                |              |
| 'AA'                   | 55.56  | 19.30 | 23.98 |       |       | 1.17 |      |       | -0.73        |             |                |              |
| 'A'                    | 11.68  | 3.65  | 29.20 | 16.79 | 32.85 | 5.11 | 0.73 |       | -2.74        | 10.95       |                |              |
| 'BBB'                  | 5.98   | 45.30 | 13.68 | 17.09 | 11.11 | 4.27 |      | 2.56  | -2.14        | 94.02       | 0.85           | 1.71         |
| 'BB'                   | 8.96   | 4.48  | 2.99  |       |       | 1.49 |      | 82.09 | -6.06        | 100.00      | 1.49           | 82.09        |

WA--Weighted average. Source: S&P Global Ratings.

- Even under the most punitive of our scenarios, with 30% of the collateral in the CLOs defaulting with a 50% recovery, about three-quarters of the CLO 'AAA' ratings either remain 'AAA' or are downgraded one notch to 'AA+'.
- No 'AAA' rating was lowered by more than five notches (below 'A') under any of the scenarios.
- As expected, ratings further down the MM CLO capital stack were affected more significantly in the hypothetical stress scenarios.
- For example, under our most stressful scenario (the above-referenced 30% default case), 94% of our 'BBB' ratings were lowered to 'BB+' or below, while 0.85% of the ratings were lowered into the 'CCC' range and 1.71% defaulted.

# Snapshot | Middle-Market Vs. BSL CLOs

|   | Middle-market loan CLOs (MM CLOs)   | Broadly syndicated loan CLOs (BSL CLOs)  |
|---|---|--|
| Proportion of U.S. CLOs (1Q 2023)         | About 9% of total U.S. CLOs by par<br>About 16% of SPGR-rated CLOs by par   | About 91% of total U.S. CLOs by par<br>About 84% of SPGR-rated U.S. CLOs by par  |
| Size of median CLO (par \$)               | About \$475 million   | About \$500 million  |
| MM and BSL loan attributes                | Senior secured loans to smaller companies: <ul style="list-style-type: none"> <li>• Loan facility sizes of \$50 million to \$300 million</li> <li>• Issuer EBITDA sizes of: <ul style="list-style-type: none"> <li>• &lt; \$20 million (lower middle market)</li> <li>• \$20 to \$50 million (core middle market)</li> <li>• \$50 to \$100 million (upper middle market)</li> </ul> </li> </ul> | Senior secured loans to larger companies: <ul style="list-style-type: none"> <li>• EBITDA greater than \$100 million; and,</li> <li>• Loan facility sizes greater than \$500 million.</li> </ul> |
| Source of CLO collateral                  | Some MM CLO managers (or their affiliates) are direct lenders and issue some/most of the loans in their CLOs  | BSL CLO managers purchase the loans for their CLOs in the open market to create a portfolio  |
| Typical issuer motivation                 | Some MM CLO managers use CLOs as a means to fund their loan business and maintain diverse funding sources   | BSL CLO managers typically use BSL CLOs as a means to build assets under management and generate fee income  |
| CLO manager relationship with borrower    | Direct lender or Investor   | Investor   |
| Risk retention                            | MM CLOs are generally subject to risk retention since the manager is the issuer of some/all the loans in the CLO  | U.S. BSL CLOs are generally not subject to risk retention since the manager acquires the loans in the open market  |
| Loan covenants                            | The smaller the loan, the more likely it is to have maintenance covenants and more restrictive provisions*  | Covenant-lite loans are the norm (80% plus of BSL loan market) along with looser provisions  |
| CLO equityholder                          | Most MM CLO managers hold their CLO equity, although some are now exploring syndicating   | Historically most BSL CLO managers have placed CLO equity with third-party investors, although this hasn't been true in 2023 year to date  |
| Junior-most 'AAA' subordination           | Typically ranges from 40% to 46% (median is 42.5%)  | Typically ranges from 34% to 39% (median is 36%)   |
| Source of ratings/implied ratings         | Credit estimates typically cover > 60% of the issuers in MM CLOs  | S&P Global Ratings has ratings on more than 95% of BSL loan issuers  |
| Rating/credit estimate profile            | See slide 18  | See slide 18   |
| Typical spreads of loans within portfolio | 5.5%  | 3.5%   |
| Maturity of loans                         | See slide 18  | See slide 18   |
| Number of obligors in CLO pool            | See slide 18  | See slide 18   |
| Number of industries in CLO pool          | Typical MM CLO 15 to 20 industries  | Typical BSL CLO has loans from ≈ 24 industry sectors   |
